Applicant(s): Donohoe, Brendan M.; et. al.
Assignee: Cardica, Inc.
Title: Integrated Anastomosis Tool with Graft Vessel Attachment Device and Cutting Device
Serial No.: 10/789,558
Examiner: Diane D. Yabut Filed: February 27, 2004
Docket No.: 151 Group Art Unit: 3734

APPLICANT-INITIATED INTERVIEW REQUEST

Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450

In compliance with MPEP 713.01, this request is submitted to the Examiner in advance of the interview, and in a form equivalent to Form PTOL-413A.

The proposed date and time of the interview is November 16th, at 9:30 a.m. The type of interview requested is personal. Tentative participants are Brian Schar, attorney for Cardica, Inc., and Examiner Diane D. Yabut. Supervising Primary Examiner of Art Unit 3734, Michael J. Hayes, is also a tentative participant, at the discretion of Examiner Yabut. An exhibit may be shown: a demonstration model of Cardica's PAS-Port® proximal anastomosis tool. A short animation of the operation of that tool may also be shown.

The issues to be discussed include:

- (1) patentability of claims 3, 4, 6-9, 12-17 and 19-20 over U.S. Pat. No. 6,605,098 to Nobis et. al. ("Nobis") because Nobis does not disclose each and every element of the claims;
- (2) patentability of claims 1, 10 and 18 over Nobis in view of U.S. Patent No. 6,673,088 to Vargas et. al. ("Vargas") because neither Nobis nor Vargas teach or suggest every element of the claims; and
- (3) potential amendments to one or more claims in order to facilitate allowance also may be discussed.

Dkt. No. 151

Assignee's attorney thanks the Examiner for her time and courtesy. Please contact the undersigned if there are any questions.

Respectfully submitted,

Brian A. Schar
